

Our curriculum vision at St Helen's CE Primary School

S eeking Achievement for all
H opeful through our Christian values
I nspire through our knowledge rich curriculum
N urturing and preparing for life through Jesus' love
E mbracing equality and diversity

Seeking achievement for all.

Our science curriculum enables children to learn key knowledge and to develop a wide range of skills. Children will investigate a range of hypotheses and test their theories to help develop their knowledge and understanding of the world around them. The science curriculum is progressive, with a clear sequence of learning, which allows children to build on what has been learned before. Children will use a wide vocabulary to describe scientific skills and processes. They will regularly recap on previous teaching to ensure 'sticky learning' takes place.

Hopeful, through our Christian Values.

Our science curriculum is built around an understanding of, and a deep belief in, our Christian mission statement. We want children to realise that the miracle of this amazing world is because of God's creation and that God gave us the world to live in and to take care of. We want children to have a deep sense of awe and wonder about the world, based on the teachings of Jesus Christ.

Inspire, through our knowledge-rich curriculum.

Our Science curriculum is designed to develop each child's curiosity and fascination about our world and its people that will remain with them for the rest of their lives. Children will be made aware of the beauty of our world, an understanding of how precious our life is and a commitment and a deep obligation to follow Jesus' footsteps by caring for this planet and the people who live in it.

Nurturing and preparing for life, through His love.

As children grow into adulthood, we hope that the foundations of our science curriculum will enable them to have a deep passion and curiosity for Planet Earth, it's life and what lies beyond. We hope they develop a determination to look after our world today and for future generations and hope the children will want to find out more for themselves. We want the children to appreciate how truly unique and special they are in our world and how God loves them unconditionally.

Embracing equality and diversity.

Our curriculum will teach the children to embrace equality and diversity by studying various hypotheses, investigating theories and developing curiosity. The children will be made aware of the importance of differences between people, their opinions and beliefs and to respect these. They will learn that we all have a role to play in supporting in each other, that we are all equal, we should value each other and appreciate differences.
